

TECHNICAL FEATURES

- ✓ reflecting 3M paper;
- ✓ Highly reflective paper with microprisms at the highest photometric yield;
- ✓ sizes: 30x30 mm, 40x40 mm, 50x50 mm.

Reflective adhesive targets of our production on highly reflective 3MTM microprismatic film. Highly reflective paper with microprisms at the highest photometric yield in both long and medium / short distances, which stands out for its excellent adhesion on all surfaces, for a + 25% reflectivity from any viewing angle and for the quality of the film.

Widely used for topographic monitoring, applied on the walls of buildings, facades of buildings, walls and containment structures,

bridges, railway tracks, tunnels, difficult to access points and much more.

Various sizes available: 30x30 mm, 40x40 mm, 50x50 mm.
